

As a production assistant on a major motion picture I need to drive for many hours during the day. Ever since I got XM, and ever since it started broadcasting up to the minute traffic reports, it has made a major impact on my driving and the amount of time it takes to travel from one place to another. It has allowed the process of making this movie faster and less burdensome on me, and my ability to perform in my job. To take this away from me would make it more difficult and more burdensome to both me and the process of making this film, especially for those waiting for me at either end of my delivery route.
